For vehicles first sold in Canada, replace the name A General Motors of Canada Limited A with Cadillac Motor Car Division whenever it appears in this manual. For more information, refer to the Memory and Characters of Personalization in the index. Lumbar Control The lumbar control is located on the outside side of each front seat. Then proceed with the lumbar adjustment. Moving the seat cushion control forward or backward to move the entire seat. Moving the seat cushion control up or down adjusts the of the seat. An indicator light on the control reminds you that the heating system is in use. Please save this manual in your vehicle, so that I can ever need it when you are on the road. The HI fit heats the seat up to a slightly upper top level The automatic movement of the seat and mirror is programmed through the Controller Information Center (DIC), so that the controller can select whether or not to move by using the RKE transmitter or by placing the ignition key in the ignition. The lumbar support can be adjusted during the massage cycle by moving the switch forward to increase the support and backward to decrease the support. Move the lumbar switch from side to side to raise or lower the mounting mechanism to suit your preference. The number on the back of the transmitter corresponds to the position of 1 or 2 seat and mirror. 5-1 problems in the Road This section informs you what to do if you have a problem while driving, such as a flat tire or an overheated engine, etc. Lumbar massage (if equipped) push the lumbar control, located on the outer side of each front seat, for up to half a second to activate the massage function. Warnings and Safety Symbols You will find a number of safety precautions in this book. In this manual, you will find that images and words work together to explain things quickly. 8-1 index here is an alphabetical list of almost all materials in this manual. In the area of precaution, we tell you what the danger is. Hot seats can only be used when the ignition is turned on.
